

A close-up photograph of a person's hands typing on a laptop keyboard. The laptop is on a light-colored wooden desk. The person is wearing a dark blue long-sleeved shirt. The background is slightly blurred, showing a white wall and a blue object. A dark blue rectangular box with white and teal text is overlaid on the right side of the image.

FRONT END DEVELOPEMNT **DESIGN, BRIEF AND SOW**

Step 1 Background and Research

What is the company?

What do they do?

What is their goal?

What is their ethos?

What is their brand/company style?

-Font, style type, content volume

What are the brand/company colours?

-Main, second, sub

What are some comparison sample websites?

What is their design brief?

Who uses the website?

What device do they mainly use?

When do they mostly use it?

What is the intended goal of the website (present information, e commerce, generate leads)?

Describe the main client demographic?

Does the customer have any special requirements?

What languages will be included?

Step 1 Background and Research

What are the main feature requirements (contact form, login, members area, google maps link, website counter, blog, Subscribers?)

What are the pages required (home, about, contact, blog, login, logout, help, policies)?

Will subscribers be obtained?

What URL/domain requirements are there?

Will emails be used?

What is the timeframe?

Who is the support person?

Will there be a designer?

What are the legislative or ethical requirements specific to this client?

Are there any restrictions and/or barriers?

Considerations:

Image load speed

Lazy loads

General SEO Principals

GA

Step 2 Develop and Plan

What technology will be used?

What languages will be used?

Who will develop content?

Who will send images?

Who will develop the design?

What is the colour scheme?

What is the typography?

What are the main element style?

What is the website overall theme?

What is the website objective and goal?

How many pages?

List out the pages:

What is the feature list?

What additional requirements exist?

How will the website be deployed?

Where will it be hosted?

Where will data be stored?

What speeds of the website is required?

How will the website be updated and maintained?

Are there any 3rd party addons (google analytics, SEO tools)?

Create Spec sheet summary:

- Hosting/server

- Technology to use

- 3rd party requirements

- Email or database

- URL requirements
